

MK Products, Inc. Announces Acquisition of Tec Welding Products, Inc.

Irvine, California – MK Products, Inc, a family owned and operated welding equipment manufacturer since 1966, is excited to announce the acquisition of Tec Welding Products, Inc., one of the original manufacturers of TIG torches and accessories. This strategic acquisition reinforces MK Products' commitment to delivering high-quality, innovative welding solutions while expanding our product offerings.

For nearly 60 years, MK Products has taken immense pride in being the manufacturer of Cobra Welding Systems, which include MIG Push-Pull Guns, Wire Feeders, Power Supplies, Spool Guns, Turntables, Orbital Power Supplies and Weldheads—all proudly made in the USA. Our commitment to quality is reflected in our ISO 9001 standards, and every product is carefully built by our dedicated team right here in California.

Tec Welding Products started life as Tec Torch Company in Elizabeth, NJ in 1955 and has earned a global reputation for producing high-quality, innovative TIG welding torches. Known for introducing groundbreaking products and holding numerous patents in TIG welding technology, Tec Welding Products offerings include renowned brands such as WeldTec®, Speedway®, i-Head®, Rocker®, Twister™, Heliweld™, and the original TEC® brand of TIG welding torches.

By combining the strengths of both companies, we are positioned to further expand our product portfolio, enhance innovation, and provide even more value for our customers. The addition of Tec Welding Products' industry-leading TIG torches complements MK Products' existing line of welding equipment, offering customers a broader selection of premium products and packaged solutions.

“We look forward to the continued success and growth of both MK Products and Tec Welding Products as we continue to evolve with a shared commitment to excellence in the welding industry” stated President and CEO, Chris Westlake.
